Tips for successful presentations

1. Don’t add too much text. Aim for ~3 bullet points max.
2. Making multiple slides is more engaging for the audience. Multiple photos? Consider showing one full-size one on each slide.
3. Explain your point using your voice, rather than writing it in a slide
4. Use speaker notes to add details for yourself, rather than reading off slides
5. Use Manrope font for all text
6. Ensure that titles are the same placement, font, and size on each slide (not jumping up or down vertically)
7. Access templates in Google slides by clicking “Layout” in the toolbar above

How to change the slide template

1. Deselect everything on the page
2. Click “Layout”
3. Select the template

To change the background

1. Deselect everything on the page
2. Click Background in the toolbar
3. Select a new image

How to apply this theme to an existing presentation

1. Open the presentation your existing presentation
2. Deselect everything on the page
3. Click “Theme” in the upper toolbar
4. Click “Import theme” in the bottom right
5. Search “2025 earthranger slide template”
6. Click on the matching result (this slide deck) and click “Insert”
7. Click the slide icon again and click “Import theme”
8. Most importantly, **check each slide to make sure nothing has shifted badly.** Adjust any slides that didn’t transition well

If you have fewer than 5 agenda items

See next slide for the agenda template

1. Delete the text boxes you don't need
2. Draw a box that matches the color of the background over the divider lines you don't need

Using mobile phone mockups

On iOS and Android layouts, the bezel and/or camera is overlaid as a separate layer on top of the image you will be placing into the image placeholder. Please don’t move them.

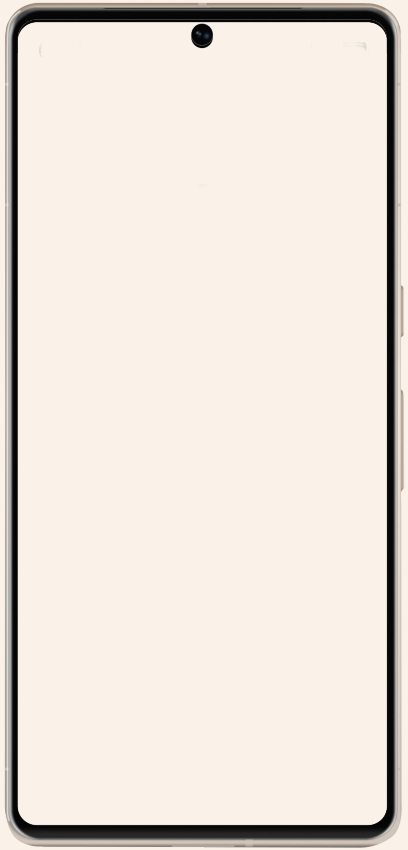

Simply replace the placeholder with your screenshot and leave the rest in place

Where can I find good icons?

Ai2 has an account for Noun Project.

- You can find the login credentials in 1Password
- If you don't already have access to 1Password, please message #it in Slack and request to be added to the Shared Vault

Once you find your icon

- In Noun Project, change the color to **HEX #0A3235 for light slide layouts** or **#FAF2E9 for dark slide layouts**
- Export as .png and add image to your slide as normal

Tables

	Column 1	Column 2	Column 3
Row 1	Text		
Row 2			

When placing text over photography

- Avoid photography with a busy background
- Choose images with enough blank space that the text doesn't overlap with the focus of the photo

See examples below
